

Your old company data could be worth \$100K to \$5M.

AI labs pay for real business records (emails, files, chat, CRM and billing history) because they show how work actually gets done. Every record is **de-identified before sale**. We value your data for free, bring you a vetted buyer and manage the deal. You keep your originals.

TYPICAL DEAL SIZE

\$210K – \$420K

Indicative range for a firm with 25 office staff and 5 years of records.

\$0

Cost to you. The buyer pays.

WHO QUALIFIES

10+ full-time office employees. That's the only size bar.

- ✓ **3+ years of records.** More history means a higher valuation.
- ✓ **Records your company owns**, in cloud or exportable systems.
- ✓ **US and international teams:** Canada, the UK, Europe, Australia and beyond.

HOW IT WORKS

- 1 Free estimate**
Two minutes online, then a short call to confirm the details.
- 2 Written offer and scope**
You choose the systems and date ranges. No obligation until you sign.
- 3 Secure export and de-identification**
Your admin signs in; the buyer's team copies and de-identifies the agreed records.
- 4 Get paid**
Typically net 30 after the AI lab accepts the data.
